

Our family pottery was started in 1972 just as you see here, by Peter Deneen sitting down at a potter's wheel. We've grown over the years, but our process is EXACTLY the same, each mug is still hand-thrown on a potter's wheel by a master potter. All of our pottery is lead and cadmium free, freezer, microwave, oven, dishwasher safe, very very durable, and **made in the USA.**

1.) Cut along the dashed line.

2.) Fold according to the markings so that you end up with this:

3.) Tape the folded piece onto the back and it should stand up all on its own!

*From everyone here at
Deneen Pottery ~ Thank You!*
